INFORMATION FOR ORDERING ACTIVITIES APPLICABLE TO ALL SPECIAL ITEM NUMBERS

SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Supply Schedules Program. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service (www.fss.gsa.gov). The catalogs/pricelists, GSA Advantage!™ and the Federal Supply Service Home Page (www.fss.gsa.gov) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

Verizon Wireless' Network

Verizon Wireless provides 800 and 1900 MHz CDMA digital voice and data services, 1xRTT NationalAccess, EV-DO BroadbandAccess, and 800 MHz Advanced Mobile Phone System (AMPS) analog service. The combination of a digital and analog network gives Verizon Wireless the ability to provide subscribers with coverage in parts of the country that some competing national carriers have yet to build out. Verizon Wireless continues to invest significantly to expand and enhance its premier network. Since 2000, Verizon Wireless has invested nearly \$5 billion in our nationwide network each year.

Verizon Wireless has chosen to invest in CDMA technology to meet our client needs. CDMA digital technology provides reliable and consistent call quality and connectivity. Verizon Wireless uses dual encoding systems to convert analog voice to digital signals. The digital signals are then coded into packets and sent across our spread-spectrum network. Spread spectrum is a technique that spreads the individual digital packets across numerous frequencies. The advantages of spread spectrum CDMA are efficiency and security. Because the digital packets can share the same bandwidth and time, individual cells can handle many more calls than a traditional analog network. The random assignment of packets to different frequencies prevents

eavesdropping and creates a highly secure network. CDMA service also virtually eliminates static and cross-talk. Dropped calls are also reduced by our "soft hand-off" capability that ensures a traveling caller is not dropped from one cell before a connection is completed to a new cell.

Verizon Wireless was the first U.S. wireless carrier to roll out a national high-speed wireless data network. Today our sizeable 3G footprint supports voice and data in the same spectrum. Based on 1xRTT technology, our 3G NationalAccess allows customers fast access to the Internet in over 1,000 cities and towns nationwide. When outside the National Enhanced Services Area, backward compatibility allows customers to access data services on our Quick 2 NetSM circuit-switched connection. Verizon Wireless continues to leverage its scale and synergies through network infrastructure expansion to accelerate the current deployment of CDMA service and 3G services, including EV-DO (BroadbandAccess).

Verizon Wireless is moving toward another milestone in its wireless broadband data service. Throughout 2007, the EV-DO network is being enhanced with EV-DO Rev. A to deliver even faster data speeds and greater efficiencies for Web browsing and accessing your STATE intranet and email higher system capacity required for next-generation wireless services.

- Faster downloads – typical speeds of 450-800Kbps (bursts up to 3.1 Mbps).*
- Faster uploads – typical speeds of 300-400 Kbps (bursts up to 1.8 Mbps).*
- Lower latency – improved performance for many applications running over the wireless BroadbandAccess and NationalAccess service areas.

National SingleRate Home Airtime Rate and Coverage Area

Calling Plans and Associated Charges: Some calling plans or monthly access price points may not be available in all markets. Subscriber's first partial and full month's access is payable in advance and will not be refunded after activation of the Wireless Service. Activation fees are waived for all Government Subscribers. Charges for calls will be based on the cell sites used, which may be outside the calling plan coverage area even when the Subscriber is physically within the coverage area. Time of the call is based on the telephone switching office that carries the call, which may be different from the time of day shown on Subscriber's phone. Rates do not apply to credit card or operator-assisted calls, which may be required in certain areas. Usage rounded up to the next full minute. Unused minutes and/or Megabytes are lost. On outgoing calls, charges start when Subscriber first presses SEND or the call connects to a network, and on incoming calls, when the call connects to a network (which may be before it rings). A call may end several seconds after Subscriber presses END or the call otherwise disconnects. Calls made on the Verizon Wireless network, are only billed if they connect (which includes calls answered by machines). Billing for airtime and related charges may sometimes be delayed. Surcharges & Fees

Verizon Wireless will bill and collect from the Agency Governmental surcharges and fees that we are required by law to bill to customers. In addition to surcharges and fees that we are required to collect, we will also collect charges to recover or help defray costs of taxes and Governmental surcharges and fees imposed on us, and costs associated with Governmental regulations and mandates on our business. These fees and surcharges charges include, among others, a 911 fee, which is required by law and varies by jurisdiction, and both a Regulatory Charge and a Federal Universal Service Charge, which are Verizon Wireless charges described below in more detail. These surcharges and fees may change from time to time without notice. Because these charges are not taxes, your tax exemptions, if any, will not apply to these charges.

Federal Universal Service Charge

Wireless carriers are assessed by the Federal Government to fund the delivery of universally-affordable telecommunications and information services under the Federal Universal Service Fund program (FUSF).

The Federal Universal Service Charge (FUSC) is a Verizon Wireless charge that is subject to change each calendar quarter based on contribution rates prescribed by the FCC. On April 1, 2008 the FUSC increased to 2.38 percent of assessable wireless charges, other than separately billed interstate and international long distance charges. The FUSC on these charges is 11.3 percent.

Regulatory Charge

The FCC assesses wireless carriers the costs of enforcement, policy and rulemaking. The Regulatory Fee recovers Verizon Wireless' share of these costs, as well as some of the costs of implementing regulatory mandates, such as number portability. The Regulatory Charge is a flat charge of \$0.07 per Mobile Telephone Number (MTN) per month, but is subject to change over time.

Both the Regulatory Charge and the FUSC are included and appear under the "Taxes, Governmental Surcharges & Fees" section of the invoice.

Regulatory fees impacting the wireless industry are constantly evolving and are subject to change without notice. For more information you can visit the FCC's website at www.fcc.gov.

Federal Acquisition Regulation (FAR) 13.303-1(a) defines Blanket Purchase Agreements (BPAs) as "...a simplified method of filling anticipated repetitive needs for supplies or services by establishing 'charge accounts' with qualified sources of supply." The use of Blanket Purchase Agreements under the Federal Supply Schedule Program is authorized in accordance with FAR 13.303-2(c)(3), which reads, in part, as follows:

"BPAs may be established with Federal Supply Schedule Contractors, if not inconsistent with the terms of the applicable schedule contract."

Federal Supply Schedule contracts contain BPA provisions to enable schedule users to maximize their administrative and purchasing savings. This feature permits schedule users to set up "accounts" with Schedule Contractors to fill recurring requirements. These accounts establish a period for the BPA and generally address issues such as the frequency of ordering and invoicing, authorized callers, discounts, delivery locations and times. Agencies may qualify for the best quantity/volume discounts available under the contract, based on the potential volume of business that may be generated through such an agreement, regardless of the size of the individual orders. In addition, agencies may be able to secure a discount higher than that available in the contract based on the aggregate volume of business possible under a BPA. Finally, Contractors may be open to a progressive type of discounting where the discount would increase once the sales accumulated under the BPA reach certain prescribed levels. Use of a BPA may be particularly useful with the new Maximum Order feature. See the Suggested Format, contained in this Schedule Pricelist, for customers to consider when using this purchasing tool.

21. CONTRACTOR TEAM ARRANGEMENTS

Contractors participating in contractor team arrangements must abide by all terms and conditions of their respective contracts. This includes compliance with Clauses 552.238-74, Contractor's Reports of Sales and 552.238-76, Industrial Funding Fee, i.e., each contractor (team member) must report sales and remit the IFF for all products and services provided under its individual contract.

22. INSTALLATION, DEINSTALLATION, REINSTALLATION

The Davis-Bacon Act (40 U.S.C. 276a-276a-7) provides that contracts in excess of \$2,000 to which the United States or the District of Columbia is a party for construction, alteration, or repair (including painting and decorating) of public buildings or public works with the United States, shall contain a clause that no laborer or mechanic employed directly upon the site of the work shall receive less than the prevailing wage rates as determined by the Secretary of Labor. The requirements of the Davis-Bacon Act do not apply if the construction work is incidental to the furnishing of supplies, equipment, or services. For example, the requirements do not apply to simple installation or alteration of a public building or public work that is incidental to furnishing supplies or equipment under a supply contract. However, if the construction, alteration or repair is segregable and exceeds \$2,000, then the requirements of the Davis-Bacon Act apply.

The ordering activity issuing the task order against this contract will be responsible for proper administration and enforcement of the Federal labor standards covered by the Davis-Bacon Act.
